

# **Flomatic**® Parts & Service Communicator

## Subject: 1028S/W Add-A-Lever

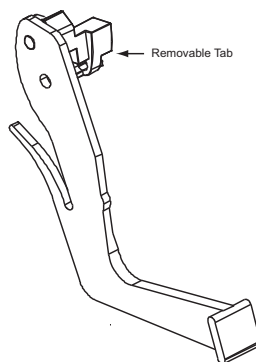

### Scope:

Flomatic valves can be easily converted to dispense soda only, or water only with the use of the Flomatic Add-A-Lever (1028 Plain, 1028W, 1028S). This part is usually installed in the field and works on mechanical, electric or portion control valves in any position on a dispenser.

### Replacing the 1027 lever with the 1028 lever:

The 1027 Add-A-Lever will no longer be available. The 1028 Add-A-Lever will work with the complete line of Domestic Flomatic post mix beverage-dispensing valves. The 1028 lever replaces the 1027 lever that was used on valves that were equipped with actuators. To adapt the 1028 lever to replace a 1027 lever you must remove the pivoting tab that engages the pallet on a valve not equipped with actuators. Remove the tab with a slight twisting and pulling action. (See Figure Below)

### Further Action:

If you have any questions, please contact Manitowoc Beverage Systems Service Department at 800-367-4233.
