

New from Wunder-Bar

A new option for your Wunder-Bar Postmix flexhose dispensers. This new 90-degree manifold assembly kit helps when installing into "tight" under-bar installations. The kit quickly and easily converts your standard or flow-regulated manifolds to a 90-degree attachment. All your inputs, brixing adjustments and shut-off screws now face towards you when servicing the dispensers. Can be mounted on back wall, side wall and makes installing to exotic bar tops (granite, marble, etc.) much easier. Available in 6, 10 & 14-button configurations to fit all your Wunder-Bar postmix manifolds requirements.

Part Numbers	Description	List Price
PM6-127	1 to 6-button type (Energy Drink type)
