

EVERPURE® MR-600 REPLACEMENT CARTRIDGE

MINERAL REDUCTION CARTRIDGE

MR-600 Replacement Cartridge: EV9627-13

APPLICATIONS

| | |
|----------------|---------------------------------|
| Coffee | Flash and conventional steamers |
| Espresso | Combi ovens |
| Reconstitution | Multiple applications |
| Ice | |

FEATURES • BENEFITS

| | |
|--|---|
| Mineral reduction cartridge for high TDS waters | Especially useful on steamers, warmers, steam boilers and other evaporative equipment that are not emptied each day |
| Sanitary cartridge replacement is simple, quick and clean. Internal filter parts are never exposed to handling or contamination | Heating surfaces maintain peak heat transfer efficiency, reducing cycle times and energy consumption |
| A reduction in Total Dissolved Solids (TDS) makes the water less likely to impart undesirable tastes in beverages, sauces, soups and other food products | Limits limescale buildup, which can cause excessive machine downtime and maintenance costs |
| Improves equipment life and performance by removing at least 90%+ of all dissolved solids using Reverse Osmosis Separation Technology | |

INSTALLATION TIPS

Install vertically with cartridge hanging down
 Allow 2-1/2" (6.35 cm) clearance below the cartridge for easy cartridge replacement
 Use piping materials suitable for high-purity water after MRS System
 Proper pre-treatment is required to control MR cartridge (membrane) scale formation and/or fouling
 Raw water hardness in excess of seven (7) grains per gallon should be softened to extend cartridge life
 The raw water may contain chlorine or other oxidizers and the use of a carbon pre-filter is recommended

OPERATION TIPS

Change MR cartridge on a regular preventative maintenance program
 Change MR cartridge when output capacity diminishes by 15%, or when output pressure becomes too low
 Always flush the MR cartridge at time of installation and cartridge change
 Contact Pentair Technical Service for pre-treatment recommendations
 Refer to Installation, Operation & Maintenance manual for cartridge flushing and RO startup

SIZING

Rated Capacity: 600 gallons per day (2,271 Liters per day) Nominal. Water pressure, feedwater quality and temperature will effect actual daily production rate
 Service Flow Rate: Dependant on water volume and pressure in storage tank(s), and line size(s) to equipment

EVERPURE® MR-600 REPLACEMENT CARTRIDGE

EV9627-13

SPECIFICATIONS

Overall Dimensions

25" L x 3.25" dia. (63.5 x 8.3 cm)

Rated Capacity

600 gallons per day (2,271 Liters per day)
Nominal. Water pressure, feedwater quality and temperature will effect actual daily production rate

Service Flow Rate

Dependant on water volume and pressure in storage tank(s), and line size(s) to equipment

Pressure Requirements

40 - 100 psi (2.7 - 6.8 bar), non-shock

Temperature

35 - 100°F (2 - 38°C)

Inlet TDS

1,000 ppm max recommended

The contaminants or other substances removed or reduced by this drinking water system are not necessarily in your water. Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system. Systems certified for cyst reduction may be used with disinfected water that may contain filterable cysts.

WARRANTY

Everpure water treatment systems by Pentair® (excluding replaceable elements) are covered by a limited warranty against defects in material and workmanship for a period of one year after date of purchase. Everpure replaceable elements (filter cartridges and water treatment cartridges) are covered by a limited warranty against defects in material and workmanship for a period of one year after date of purchase. See printed warranty for details. Pentair will provide a copy of the warranty upon request.
